SUMMARY

Tech-savvy data analyst with a strong foundation on data analysis. Dedicated to automating tasks and utilize various tools to enable data-driven decision making. I am proficient in PostgreSQL, Python, Tableau, and Looker Studio to automate reports and perform data analysis.

WORK EXPERIENCE

Data Analyst   **May 2023 - Present**
Mega Global Corporation   *Quezon City, Metro Manila*

- Integrated over 70 google spreadsheets into PostgreSQL database by creating python ETL scripts, eliminating manual data processing and automating data migration.
- Utilized Looker Studio to develop dashboards, saving costs associated with Tableau viewer accounts.
- Optimized Tableau and Looker Studio dashboard performance by executing complex data transformation with SQL and python, reducing the use of the BI tool functions.
- Built over 30 SQL views, streamlining data extraction and improving overall data quality.
- Developed reports with Tableau and Looker Studio for HR and department heads to track employee attendance and timekeeping filings, leading to successful employee management.
- Assist the sales team in streamlining the creation of reports to conduct sales trend analysis and identify key performance indicators, facilitating data-driven decision making.

EDUCATION

Data Associate   **August 2023 – November 2023**
Development Academy of the Philippines   *Online*

BS Mechanical Engineering   **August 2018 - July 2022**
De La Salle University - Dasmariñas   *Dasmariñas, Cavite*

SKILLS

- **Skills:** PostgreSQL, Python, Git, Tableau, Looker Studio, Microsoft Excel, PowerBI
- **Programming Tools:** VS Code, JupyterLab, pgAdmin4
- **Python Libraries:** pandas, NumPy, sqlalchemy, psycopg2, matplotlib, seaborn, gsheets
